## Project Pattern Issue #68

### Squares & More Squares

You can use this pattern to create a fused tile or plate, or a mosaic garden stone. Feel free to adapt the design as necessary.

#### Materials

- A) 3"x3" square bevel or stained glass
- B) Four 2"x2" square bevels or stained glass
- C,D,E) 1/2 square foot each
- F) 1 square foot

Piece "A" is the center. You can use a 3"x3" square bevel or cut one piece of stained glass that size.

You can use 2"x2" square bevels for the "B" pieces, or cut 4 pieces of stained glass that size.

For the rest of the pieces (C,D,E,F), you will need to cut 4 of each pattern piece.

After cutting one of piece "A" and four of all the others, use the graphic at the top right of the pattern (or the photo on the front of SCN #68) as a guide to assemble the pieces into a square panel.
